SUBJECT INDEX

Alkane
Correlation and prediction of excess enthalpies of ester + *n*-alkane systems using the UNIFAC model 207
Ammonium nitrate
Effect of sample mass on the kinetics of thermal decomposition of a solid. Part 3. Non-isothermal mass-loss process of molten NH_4NO_3 141
Ammonium sulphate
Interaction of $(NH_4)_2SO_4$ and $FeSO_4$ with metal oxides and ferrites 225
Arsenic compound
Thermochemistry of adducts of bidentate N- and O-ligands with arsenic trihalides 91
Atmosphere
The chemistry and mechanism of thermal degradation reactions of oxovanadium(IV) complexes of dithiocarbamates containing a thiadiazole ring 101
ATSB
The pyrolytic decomposition of aluminium-tri-*sec*-butoxide during chemical vapour deposition of thin alumina films 67

BAB
The thermal and temperature dependence of the electrical conductivity of phenylhydrazo and benzeneazo benzoylacetones and their isonicotinoyl hydrazones 153
BABH
The thermal and temperature dependence of the electrical conductivity of phenylhydrazo and benzeneazo benzoylacetones and their isonicotinoyl hydrazones 153
Barium compound
Dynamic evaporation behaviour of diketonate compounds of yttrium, copper and barium 129
BET
Diesel particulate characterisation by vacuum microbalance techniques 257
Binary system
Calculations of quaternary liquid–liquid equilibria by use of a new local composition model 31
Correlation and prediction of excess enthalpies of ester + *n*-alkane systems using the UNIFAC model 207
Bond
Thermochemistry of adducts of bidentate N- and O-ligands with arsenic trihalides 91

Catalyst
Investigation concerning bimetallic catalysts using nonisothermal (temperature programmed reduction (TPR) and temperature programmed desorption (TPD)) and isothermal methods. Part 2. Nickel–chromium pre-reduced catalysts 199
Cobalt compound
Preparation, structural characterisation, thermal and electrical studies of complexes of cobalt, nickel and copper with methyl-3-pyridyl-carbamate 215
Combustion
The influence of mass transfer in DTG combustion tests 79
Conductivity
Preparation, structural characterisation, thermal and electrical studies of complexes of cobalt, nickel and copper with methyl-3-pyridyl-carbamate 215
The thermal and temperature dependence of the electrical conductivity of phenylhydrazo and benzeneazo benzoylacetones and their isonicotinoyl hydrazones 153
Co-ordination
Preparation, structural characterisation, thermal and electrical studies of complexes of cobalt, nickel and copper with methyl-3-pyridyl-carbamate 215
Thermal behavior of substituted pyridine adducts of porphyrinatocobalt(II) complexes in the solid state 109
Copper compound
Dynamic evaporation behaviour of diketonate compounds of yttrium, copper and barium 129
Preparation, structural characterisation, thermal and electrical studies of complexes of cobalt, nickel and copper with methyl-3-pyridyl-carbamate 215
Copper hydroxy carbonate
The application of constant rate thermal analysis to the study of the thermal decomposition of copper hydroxy carbonate 117

Co-solvent
Some remarks on the interactions of $NaBPh_4$ and Ph_4PX with solvents 1
Coupled technique
Effect of sample mass on the kinetics of thermal decomposition of a solid. Part 3. Non-isothermal mass-loss process of molten NH_4NO_3 141
Cross link
Polymers from renewable resources. Part 3. Thermal analysis of the interpenetrating polymer networks derived from castor oil, polyurethane–polyacrylates 235
CRTA
Development of a new thermogravimetric system for performing constant rate thermal analysis (CRTA) under controlled atmosphere at pressures ranging from vacuum to 1 bar 167
Influence of pressure on the shape of TG and controlled transformation rate thermal analysis (CRTA) traces 247
The application of constant rate thermal analysis to the study of the thermal decomposition of copper hydroxy carbonate 117
Crystallization
Thermal behavior of substituted pyridine adducts of porphyrinatocobalt(II) complexes in the solid state 109

Damköhler number
The influence of mass transfer in DTG combustion tests 79
Decomposition
Effect of sample mass on the kinetics of thermal decomposition of a solid. Part 3. Non-isothermal mass-loss process of molten NH_4NO_3 141
The application of constant rate thermal analysis to the study of the thermal decomposition of copper hydroxy carbonate 117
The pyrolytic decomposition of aluminium-tri-*sec*-butoxide during chemical vapour deposition of thin alumina films 67
Thermal properties of sodium–light-lanthanoid double sulfate monohydrates 185
Degradation
Polymers from renewable resources. Part 3. Thermal analysis of the interpenetrating polymer networks derived from castor oil, polyurethane–polyacrylates 235
Dehydration
Thermal properties of sodium–light-lanthanoid double sulfate monohydrates 185
Diesel
Diesel particulate characterisation by vacuum microbalance techniques 257
Diketonate
Dynamic evaporation behaviour of diketonate compounds of yttrium, copper and barium 129
Double salt
Thermal properties of sodium–light-lanthanoid double sulfate monohydrates 185
Double sulphate
Thermal properties of sodium–light-lanthanoid double sulfate monohydrates 185
DSC
The chemistry and mechanism of thermal degradation reactions of oxovanadium(IV) complexes of dithiocarbamates containing a thiadiazole ring 101
Thermal behavior of substituted pyridine adducts of porphyrinatocobalt(II) complexes in the solid state 109
Thermochemistry of adducts of bidentate N- and O-ligands with arsenic trihalides 91
DTA
Application of a Simon-type equation to the relationship between glass transition temperature and pressure for polymers 23
Interaction of $(NH_4)_2SO_4$ and $FeSO_4$ with metal oxides and ferrites 225
Preparation, structural characterisation, thermal and electrical studies of complexes of cobalt, nickel and copper with methyl-3-pyridyl-carbamate 215
The thermal and temperature dependence of the electrical conductivity of phenylhydrazo and benzeneazo benzoylacetones and their isonicotinoyl hydrazones 153
Thermal properties of sodium–light-lanthanoid double sulfate monohydrates 185
Thermal studies of some transition metal complexes of phenylazoacetoacetanilide (HPAAC) 175
DTG
Effect of sample mass on the kinetics of thermal decomposition of a solid. Part 3. Non-isothermal mass-loss process of molten NH_4NO_3 141
The chemistry and mechanism of thermal degradation reactions of oxovanadium(IV) complexes of dithiocarbamates containing a thiadiazole ring 101
The influence of mass transfer in DTG combustion tests 79
Thermal properties of sodium–light-lanthanoid double sulfate monohydrates 185

dTMA
The thermal behaviour of potential polymeric precursors for silicon carbide fibres 11

Ester
Correlation and prediction of excess enthalpies of ester + *n*-alkane systems using the UNIFAC model 207

Evaporation
Dynamic evaporation behaviour of diketonate compounds of yttrium, copper and barium 129

Ferrite
Interaction of $(NH_4)_2SO_4$ and $FeSO_4$ with metal oxides and ferrites 225

Fibre
The thermal behaviour of potential polymeric precursors for silicon carbide fibres 11

Glass transition
Application of a Simon-type equation to the relationship between glass transition temperature and pressure for polymers 23

Heat of decomposition
Thermochemistry of adducts of bidentate N- and O-ligands with arsenic trihalides 91

Heat of reaction
Thermochemistry of adducts of bidentate N- and O-ligands with arsenic trihalides 91

Heat of solution
Some remarks on the interactions of $NaBPh_4$ and Ph_4PX with solvents 1

HMX
Estimation of the thermodynamic properties of nitroguanidine, hexahydro-1,3,5-trinitro-1,3,5-triazine and octahydro-1,3,5,7-tetranitro-1,3,5,7-tetrazocine in the gas phase 47

HPAAC
Thermal studies of some transition metal complexes of phenylazoacetoacetanilide (HPAAC) 175

HTS
Dynamic evaporation behaviour of diketonate compounds of yttrium, copper and barium 129

Hydrazone
The thermal and temperature dependence of the electrical conductivity of phenylhydrazo and benzeneazo benzoylacetones and their isonicotinoyl hydrazones 153

Innovation
Development of a new thermogravimetric system for performing constant rate thermal analysis (CRTA) under controlled atmosphere at pressures ranging from vacuum to 1 bar 167

IR
Thermal properties of sodium–light-lanthanoid double sulfate monohydrates 185
The chemistry and mechanism of thermal degradation reactions of oxovanadium(IV) complexes of dithiocarbamates containing a thiadiazole ring 101

Iron sulphate
Interaction of $(NH_4)_2SO_4$ and $FeSO_4$ with metal oxides and ferrites 225

Isomer
The thermal and temperature dependence of the electrical conductivity of phenylhydrazo and benzeneazo benzoylacetones and their isonicotinoyl hydrazones 153

Isothermal
Influence of pressure on the shape of TG and controlled transformation rate thermal analysis (CRTA) traces 247
Investigation concerning bimetallic catalysts using nonisothermal (temperature programmed reduction (TPR) and temperature programmed desorption (TPD)) and isothermal methods. Part 2. Nickel–chromium prereduced catalysts 199

Jump CRTA
Development of a new thermogravimetric system for performing constant rate thermal analysis (CRTA) under controlled atmosphere at pressures ranging from vacuum to 1 bar 167

Kinetics
Effect of sample mass on the kinetics of thermal decomposition of a solid. Part 3. Non-isothermal mass-loss process of molten NH_4NO_3 141
Influence of pressure on the shape of TG and controlled transformation rate thermal analysis (CRTA) traces 247
The application of constant rate thermal analysis to the study of the thermal decomposition of copper hydroxy carbonate 117

Lanthanon compound
Thermal properties of sodium–light-lanthanoid double sulfate monohydrates 185

Lattice energy
Thermal behavior of substituted pyridine adducts of porphyrinatocobalt(II) complexes in the solid state 109

Lewis acid
Thermochemistry of adducts of bidentate N- and O-ligands with arsenic trihalides 91

Lewis base
Thermochemistry of adducts of bidentate N- and O-ligands with arsenic trihalides 91
Ligand
The chemistry and mechanism of thermal degradation reactions of oxovanadium(IV) complexes of dithiocarbamates containing a thiadiazole ring 101
Thermochemistry of adducts of bidentate N- and O-ligands with arsenic trihalides 91
LLE
Calculations of quaternary liquid–liquid equilibria by use of a new local composition model 31

Mass transfer
The influence of mass transfer in DTG combustion tests 79
Mechanism
The pyrolytic decomposition of aluminium-tri-*sec*-butoxide during chemical vapour deposition of thin alumina films 67
Microbalance
Development of a new thermogravimetric system for performing constant rate thermal analysis (CRTA) under controlled atmosphere at pressures ranging from vacuum to 1 bar 167
Diesel particulate characterisation by vacuum microbalance techniques 257
MOCVD
The pyrolytic decomposition of aluminium-tri-*sec*-butoxide during chemical vapour deposition of thin alumina films 67
Model
Calculations of quaternary liquid–liquid equilibria by use of a new local composition model 31
Correlation and prediction of excess enthalpies of ester + *n*-alkane systems using the UNIFAC model 207
Correlation and prediction of excess enthalpies of ester + *n*-alkane systems using the UNIFAC model 207
Moessbauer
Interaction of $(NH_4)_2SO_4$ and $FeSO_4$ with metal oxides and ferrites 225
MS
The pyrolytic decomposition of aluminium-tri-*sec*-butoxide during chemical vapour deposition of thin alumina films 67

Nickel compound
Preparation, structural characterisation, thermal and electrical studies of complexes of cobalt, nickel and copper with methyl-3-pyridyl-carbamate 215
Nitroguanidine
Estimation of the thermodynamic properties of nitroguanidine, hexahydro-1,3,5-trinitro-1,3,5-triazine and octahydro-1,3,5,7-tetranitro-1,3,5,7-tetrazocine in the gas phase 47
Non-isothermal
Effect of sample mass on the kinetics of thermal decomposition of a solid. Part 3. Non-isothermal mass-loss process of molten NH_4NO_3 141
Investigation concerning bimetallic catalysts using nonisothermal (temperature programmed reduction (TPR) and temperature programmed desorption (TPD)) and isothermal methods. Part 2. Nickel–chromium pre-reduced catalysts 199
The chemistry and mechanism of thermal degradation reactions of oxovanadium(IV) complexes of dithiocarbamates containing a thiadiazole ring 101
Novel
Development of a new thermogravimetric system for performing constant rate thermal analysis (CRTA) under controlled atmosphere at pressures ranging from vacuum to 1 bar 167

Oxide
Interaction of $(NH_4)_2SO_4$ and $FeSO_4$ with metal oxides and ferrites 225
Oxovanadium compound
The chemistry and mechanism of thermal degradation reactions of oxovanadium(IV) complexes of dithiocarbamates containing a thiadiazole ring 101

Pair interaction
Some remarks on the interactions of $NaBPh_4$ and Ph_4PX with solvents 1
Particulate
Diesel particulate characterisation by vacuum microbalance techniques 257
PHB
The thermal and temperature dependence of the electrical conductivity of phenylhydrazo and benzeneazo benzoylacetones and their isonicotinoyl hydrazones 153
PHBH
The thermal and temperature dependence of the electrical conductivity of phenylhydrazo and benzeneazo benzoylacetones and their isonicotinoyl hydrazones 153
Polymer
Application of a Simon-type equation to the relationship between glass transition temperature and pressure for polymers 23

Polymers from renewable resources. Part 3. Thermal analysis of the interpenetrating polymer networks derived from castor oil, polyurethane–polyacrylates 235
The thermal behaviour of potential polymeric precursors for silicon carbide fibres 11

Polymeric precursor
The thermal behaviour of potential polymeric precursors for silicon carbide fibres 11

Porphyrin
Thermal behavior of substituted pyridine adducts of porphyrinatocobalt(II) complexes in the solid state 109

Pressure
Application of a Simon-type equation to the relationship between glass transition temperature and pressure for polymers 23
Development of a new thermogravimetric system for performing constant rate thermal analysis (CRTA) under controlled atmosphere at pressures ranging from vacuum to 1 bar 167
Influence of pressure on the shape of TG and controlled transformation rate thermal analysis (CRTA) traces 247

Program
Polymers from renewable resources. Part 3. Thermal analysis of the interpenetrating polymer networks derived from castor oil, polyurethane–polyacrylates 235

PU
Polymers from renewable resources. Part 3. Thermal analysis of the interpenetrating polymer networks derived from castor oil, polyurethane–polyacrylates 235

Pulse adsorption
Investigation concerning bimetallic catalysts using nonisothermal (temperature programmed reduction (TPR) and temperature programmed desorption (TPD)) and isothermal methods. Part 2. Nickel–chromium prereduced catalysts 199

Pyrolysis
The pyrolytic decomposition of aluminium-tri-*sec*-butoxide during chemical vapour deposition of thin alumina films 67

Quaternary system
Calculations of quaternary liquid–liquid equilibria by use of a new local composition model 31

RDX
Estimation of the thermodynamic properties of nitroguanidine, hexahydro-1,3,5-trinitro-1,3,5-triazine and octahydro-1,3,5,7-tetranitro-1,3,5,7-tetrazocine in the gas phase 47

Silicon carbide
The thermal behaviour of potential polymeric precursors for silicon carbide fibres 11

Spectroscopy
Thermal behavior of substituted pyridine adducts of porphyrinatocobalt(II) complexes in the solid state 109

Stability
Thermal behavior of substituted pyridine adducts of porphyrinatocobalt(II) complexes in the solid state 109

Sulphatization
Interaction of $(NH_4)_2SO_4$ and $FeSO_4$ with metal oxides and ferrites 225

Superconductor
Dynamic evaporation behaviour of diketonate compounds of yttrium, copper and barium 129

Tautomer
The thermal and temperature dependence of the electrical conductivity of phenylhydrazo and benzeneazo benzoylacetones and their isonicotinoyl hydrazones 153

TD
Diesel particulate characterisation by vacuum microbalance techniques 257

Temperature
Application of a Simon-type equation to the relationship between glass transition temperature and pressure for polymers 23

TG
Effect of sample mass on the kinetics of thermal decomposition of a solid. Part 3. Non-isothermal mass-loss process of molten NH_4NO_3 141
Influence of pressure on the shape of TG and controlled transformation rate thermal analysis (CRTA) traces 247
Polymers from renewable resources. Part 3. Thermal analysis of the interpenetrating polymer networks derived from castor oil, polyurethane–polyacrylates 235
Preparation, structural characterisation, thermal and electrical studies of complexes of cobalt, nickel and copper with methyl-3-pyridyl-carbamate 215
The chemistry and mechanism of thermal degradation reactions of oxovanadium(IV) complexes of dithiocarbamates containing a thiadiazole ring 101
The thermal and temperature dependence of the electrical conductivity of phenylhydrazo and benzeneazo benzoylacetones and their isonicotinoyl hydrazones 153
The thermal behaviour of potential polymeric precursors for silicon carbide fibres 11
Thermal behavior of substituted pyridine ad-

ducts of porphyrinatocobalt(II) complexes in the solid state 109
Thermal properties of sodium–light-lanthanoid double sulfate monohydrates 185
Thermal studies of some transition metal complexes of phenylazoacetoacetanilide (HPAAC) 175
Thermochemistry of adducts of bidentate N- and O-ligands with arsenic trihalides 91
Interaction of $(NH_4)_2SO_4$ and $FeSO_4$ with metal oxides and ferrites 225
TGA
The application of constant rate thermal analysis to the study of the thermal decomposition of copper hydroxy carbonate 117
Thermochromism
The thermal and temperature dependence of the electrical conductivity of phenylhydrazo and benzeneazo benzoylacetones and their isonicotinoyl hydrazones 153
Thermodynamics
Estimation of the thermodynamic properties of nitroguanidine, hexahydro-1,3,5-trinitro-1,3,5-triazine and octahydro-1,3,5,7-tetranitro-1,3,5,7-tetrazocine in the gas phase 47
Thiele modulus
The influence of mass transfer in DTG combustion tests 79
Thiocyanate
Preparation, structural characterisation, thermal and electrical studies of complexes of cobalt, nickel and copper with methyl-3-pyridyl-carbamate 215
TMA
The thermal behaviour of potential polymeric precursors for silicon carbide fibres 11
TPD
Investigation concerning bimetallic catalysts using nonisothermal (temperature programmed reduction (TPR) and temperature programmed desorption (TPD)) and isothermal methods. Part 2. Nickel–chromium prereduced catalysts 199
TPR
Investigation concerning bimetallic catalysts using nonisothermal (temperature programmed reduction (TPR) and temperature programmed desorption (TPD)) and isothermal methods. Part 2. Nickel–chromium prereduced catalysts 199
Transition metal compound
Thermal studies of some transition metal complexes of phenylazoacetoacetanilide (HPAAC) 175

UNIFAC
Correlation and prediction of excess enthalpies of ester + *n*-alkane systems using the UNIFAC model 207

VLE
Calculations of quaternary liquid–liquid equilibria by use of a new local composition model 31

XRD
Interaction of $(NH_4)_2SO_4$ and $FeSO_4$ with metal oxides and ferrites 225
The application of constant rate thermal analysis to the study of the thermal decomposition of copper hydroxy carbonate 117
Thermal properties of sodium–light-lanthanoid double sulfate monohydrates 185

YBCO
Dynamic evaporation behaviour of diketonate compounds of yttrium, copper and barium 129
Yttrium compound
Dynamic evaporation behaviour of diketonate compounds of yttrium, copper and barium 129
